

Faust's Potions

Faust's Potions®

Introducing: Faust's Essential Travel Kit

Designed specifically to ease the effects of an evening's overindulgence, the two potions - 'Asleep' and 'Awake' - can be taken post-party and the morning after respectively, and were selected as Harper's Bazaar 2011 'Festival Beauty Product of the Year'. However, the fact that flightiness-of-foot seems to be a common characteristic of our bon-vivant customers has led to an important discovery - Faust's Potions do wonders for jet lag!

The elixirs are restorative blends of vitamins, herbal remedies and nutritional supplements, pleasant tasting yet containing no added sugar or artificial flavouring. Honey, electrolytes, 5HTP, B-vitamins, Green Tea, Guarana, Ginseng and the 'wonder-compound' N-Acetyl Cysteine are just some of their more magical ingredients. They are literally full to bursting with antioxidants. An Asleep Potion on boarding and an Awake Potion on landing, however long the journey, will ensure the traveller a restorative nap, alertness on arrival, and provide vital protection from the increased free radicals we expose ourselves to whilst flying.

Faust's Revitalising Face Spray is made of 100% bulgarian rosewater and is a deliciously refreshing way to combat the dryness of a long haul flight. As well as nourishing the skin, rose has been proven to lower the concentration of cortisol (a stress hormone) in the blood, so the Face Spray can be a reassuring item for nervous flyers.

Joined by a sumptuously soft black silk eye mask and earplugs, and slipped snugly into an elegant calf leather purse, Faust's Essential Travel Kit creates the luxurious feeling of a first class flight, wherever in the plane you're seated!

Founder Nina Faust says: "Our Potions were created as an effective natural health supplement for bon-viveurs, workaholics and jet-setters who are far too busy to take the foot off the pedal whether they're working or having fun." The Travel Pack does allow (in fact, helps) our customers to take the foot off the pedal, but just for a moment - just long enough to ensure full throttle acceleration on arrival!
