

Faust's Potions®

The Covert Hangover Cure
and A Must-Have for holidays

Faust's Essential Travel Kit, £38

Leave space in your luggage for this BRAND NEW white buttery-soft leather case, containing a silk eyemask, 3M earplugs, two sets of Awake and Asleep Potions and a Revitalising Face Spray.

If your heading away for the weekend or a long summer holiday then this travel kit is a must have to help alleviate jetlag, fatigue and the symptoms of a 'holiday' hangover!

The hallmarks of a hangover include nausea, sensitivity to light, headaches, lethargy, diarrhoea (ahem), and decreased motor skills. But, thanks to Faust's Potions, you can ditch the classic cola + carbs combo for some strategic supplementing.

Faust's Potions are diminutive, apothecary-style vials containing an all-natural, bespoke blend of vitamins and herbs, formulated to lift your spirits and stamp out the symptoms of alcohol-induced suffering.

Faust's Asleep Potion

Think of this berry flavoured bedtime tonic as damage limitation. Although it can't quell the telltale consequences of a hangover completely, the souped-up formula helps you slip into a peaceful, restorative slumber, giving you a fighting chance come morning.

Electrolytes rehydrate and see off sore heads, 5HTP boosts serotonin levels to regulate digestion and ease anxiety, N-Acetyl Cysteine, an amino acid and powerful antioxidant, tackles lingering toxins. Honey stimulates the elimination of alcohol from the bloodstream.

Faust's Awake Potion

Take this before a night out, to preload on essential nutrients. Or when the worst of it is waiting for you the morning after, having this orange-flavoured pick-me-up in your arsenal will fast-track your recovery. An all round energising tonic that is known for its ultra-nourishing, immunity-boosting benefits - not quite a cure, but it might just coax you out of bed and onto your sun lounger before midday.

- N-Acetyl Cysteine, an antioxidant powerhouse, protects cells from the damaging effect of alcohol
- Electrolytes replenish minerals leached by toxins to shake off sluggishness
- Green tea is rich in catechins which boost liver function
- Guarana settles tummys, has painkiller properties and its a source of caffeine
- Ginseng is known to increase energy and jog your memory
- B vitamins help convert food to energy
- Vitamin C has a well-earned reputation for kicking colds to the curb, but it also plays a part in making complexion-boosting collagen
